Dear Cathy

TRANS NET.

I am writing with regard to the TRANSNET Working Group which has been set up within UKINETS. It was recognised that as part of the next stage of development of UKINETS we need to support Translational Research in addition to our work with Clinical Trials and hopefully these two areas will actually dovetail nicely. It is therefore proposed to launch TRANSNET immediately prior to the next UKINETS annual Scientific Meeting and this will be held on 31st October in London at the Millennium Hotel.

This will bring together all the interested parties in the United Kingdom and Ireland who are interested in supporting Clinical Research and Translational Science to support the NET Cancer Treatment in the UK. The first meeting will really act as a launch pad when a number of ideas will be thrown around and then prioritise how we take on these developments. Obviously we are very dependant on charitable monies to support these initiatives and anything that you can do through the NET Patient Foundation would be extremely valuable.

I hope this is useful to you. Obviously we would plan an annual meeting and sub groups would meet in between times and would be happy to feed back to you as we go along.

Yours sincerely

Dr N S Reed
Consultant in Clinical Oncology
